

Oils und Waxes

Oils are required for the manufacturing of a large number of products as a basic material, as a process aid or for synthesis. The largest quantities are required in the manufacturing of polymers as well as detergents and cleaning agents. As an independent and reliable supply partner, we are happy to offer you the right product in the right quality.

Raw material Oils

Vegetable oils

Thistle oil cold pressed

Thistle oil refined

Linseed oil

Linseed oil cold pressed

Linseed oil with high iodine value

Refined linseed oil

Linseed oil refined light

Rapeseed oil refined

Rapeseed oil raw

Castor oil hydrogenated

Castor oil FSG / First Special Grade

Castor oil polymerised

Castor oil refined BP Grade

Soybean oil refined

Sunflower oil refined

Tung oil / Wood oil

Natural oil polyols

Castor oil polyether ester

Castor oil polyester

Partially hydrogenated castor oil

Oxidised oils

Linseed oil

Rapeseed oil

Castor oil

Waxes are used in similar applications as oils with the crucial difference that waxes are solids at room temperature. This has a great influence on the processability and the properties of the products. We will be happy to offer you the right product from our portfolio.

Raw material Waxes

Oxidised waxes

Hydroxyamide waxes

Hydroxystearate waxes

Hydroxy waxes

Oxygen treated microwax

Oxygen treated paraffin wax
